

Module	FR ID	Requirement Name	Description	Priority	Source	Status
Module Number	Requirement ID	Short Title	Functional Specification	Priority Level	Requirement Source	Status
Module 1: User Identity, Access, & Organizational Structure						
Module 1	FR-001	Create User Account	The system shall allow only the Systems Admin to create employee accounts in the system using the bio data of the employee. Upon successful creation, the system shall securely transmit the account credentials and profile data directly to the appropriate external APIs—provisioning roles in the DMS and FOMS. Newly created accounts remain in a 'Pending' state until the user successfully logs it in the system with the verification sent to their email.	High	Security & Integration Requirement	DONE
	FR-002	Generate Initial Password	The system shall automatically generate a temporary password when the Systems Admin creates a new employee account. The password shall be sent directly to the user via SMTP (Gmail integration) ensuring system administrators never see the plaintext password.	High	Security Requirement	DONE
	FR-003	Update User Account Information	The system shall allow only the Systems Admin and the Account Owner to update employee account information when necessary.	High	Business Requirement	DONE
	FR-004	Delete or Deactivate User Account	The system shall allow only the Systems Admin to deactivate or delete employee accounts from the system.	High	Security and Business Requirement	DONE
	FR-005	Activate User Account	The system shall allow only the Systems Admin to activate employee accounts from the system if it is deactivated whether during login failure or if a Systems Admin manually deactivated it.	High	Security and Business Requirement	DONE
	FR-006	Assign System Roles	The system shall allow only the Systems Admin to assign system roles (Systems Admin, Operations Admin, or Operational Team (Coordinator and Encoder) to employees when creating or updating accounts.	High	Business Requirement	DONE
	FR-007	Search Users	The system shall allow Systems Admin to search employee accounts by employee ID, name, username, or role.	High	Business Requirement	DONE
	FR-008	Filter and Sort Records	The system shall allow Systems Admin to filter and sort user records based on selected criteria.	High	Operational Requirement	DONE
	FR-009	View Account Status	The system shall display account status such as Active, Deactivated, or On Leave that only the System admin can view.	High	Operational Requirement	DONE
	FR-010	Blind Provisioning	Automated, system-generated passwords sent directly to the user via SMTP (Gmail integration) ensuring system administrators never see the plaintext password.	High	Security Requirement	DONE
	FR-011	Department and Position Management	The system shall allow authorized Admin users to create, update, and manage organizational departments (e.g., IT, Finance, Operations) and specific job positions within those departments.	High	Operational Requirement	PENDING
Module 2: Time, Attendance, & Leave Management						
	FR-012	Submit Leave Request	The system shall allow Operational Team members to submit a formal time-off request by specifying the start date, end date, and reason. The leave request varies from Sick Leave, Vacation Leave, or Emergency Leave.	Medium	Operational Requirement	DONE
	FR-013	Leave Approval Workflow	The system shall allow the Systems Admin to view, approve, or deny pending leave requests.	Medium	Operational Requirement	DONE
	FR-014	Formal Availability Update	The system shall automatically flag an employee's Availability Status as 'On Leave' in the database during their approved leave dates.	Medium	Core Business Logic	DONE
	FR-015	Active Leave Lockout	The system shall deny standard login access to any employee whose account is formally flagged as 'On Leave' for the current date. When the employee tries to log in, the system shall display an 'Access Denied: On Leave' notification. For field personnel, HROMS shall broadcast this 'On Leave' flag to the DMS API to automatically restrict the dispatch of delivery orders to that specific driver.	Medium	Security & Integration Requirement	DONE

Module	FR ID	Requirement Name	Description	Priority	Source	Status
Module Number	Requirement ID	Short Title	Functional Specification	Priority Level	Requirement Source	Status
Module 2	FR-016	Emergency Access Override	The system shall provide an 'Emergency Override' request button for on-leave employees, only allowing the Admin users to temporarily restore their 'Online' status and system access for the day.	Medium	Security Requirement	DONE
	FR-017	Leave Override Approval	The system shall alert the Admin users of any pending emergency access requests and provide the functionality to approve or deny the override.	Medium	Operational Requirement	DONE
	FR-018	Scheduled Leave Accrual Execution	The system shall utilize a backend scheduled service to automatically calculate and disburse prorated leave credits (e.g., Vacation, Sick) to all active employee accounts. This automated disbursement shall execute at a predefined recurring interval (e.g., the 1st of every month) without requiring manual Admin intervention.	Medium	Operational Requirement	PENDING
	FR-019	Real-Time Balance Tracking	The system shall maintain and display an updated, real-time ledger of an employee's available leave balance on their personal dashboard, reflecting both automated accruals and approved deductions.	Medium	Operational Requirement	PENDING
	FR-020	Mathematical Request Validation	When an employee submits a leave request, the system shall automatically validate the requested number of days against their current accrued balance. The system shall reject the request and disable submission if the requested duration exceeds the mathematically available credits. Each regular employee shall only have a maximum of 10 days of leave per year and they can only take a leave with a maximum of 2 days each month.	Low	System Integrity Requirement	PENDING
	FR-021	Biometric Device Synchronization Endpoint	The system shall provide a secure API endpoint or utilize a device SDK to receive raw, real-time punch logs (clock-in and clock-out events) directly from the registered biometric scanner hardware via the local network.	Medium	Core Hardware Integration Requirement	PENDING
	FR-022	Biometric ID to Employee Mapping	The system shall allow the HR Operations Admin to map a physical Biometric ID number (generated by the scanner hardware) to a specific employee's digital Employee_ID within the system to ensure accurate tracking.	Medium	Data Integrity Requirement	PENDING
	FR-023	Automated Daily Time Record (DTR) Calculation	The system shall automatically process raw biometric punch logs to calculate daily attendance metrics, specifically determining Total Hours Worked, Tardy (Late) occurrences, and Undertime hours based on predefined organizational shift schedules.	Medium	Core Business Logic	PENDING
	FR-024	Biometric Log Fallback (Manual Upload)	The system shall provide a fallback utility allowing authorized Admin users to manually upload the raw CSV/Excel export file from the biometric scanner in the event of a local network failure or API synchronization downtime.	Medium	System Reliability Requirement	PENDING
	FR-025	Real-Time Attendance Monitoring Dashboard	The system shall render a real-time dashboard for Admin users displaying the current physical attendance status of all active employees (e.g., Clocking In, Clocking Out, Missing Punch).	Medium	Management Requirement	PENDING
	FR-026	Attendance Anomaly Flagging	The system shall automatically flag and notify the HR Operations Admin of any attendance anomalies, such as an employee clocking in but missing a corresponding clock-out punch by the end of the predefined shift duration.	Low	Operational Requirement	PENDING
Module 3: Employee Profiles & Digital 201 File Management						
	FR-027	Profile Management	The system shall allow account owners to View their profile, update basic information, and change password.	High	Operational Requirement	DONE
	FR-028	View Digital 201 File	The system shall allow authorized Systems Admin and HR Operations Admin users to view an employee's complete Digital 201 File containing employment, compliance, performance, and disciplinary records.	High	Security Requirement	PENDING

Module	FR ID	Requirement Name	Description	Priority	Source	Status
Module Number	Requirement ID	Short Title	Functional Specification	Priority Level	Requirement Source	Status
Module 3	FR-029	Employee Document Management	The system shall allow authorized Admin users to upload, update, archive, and manage employee-related documents within the Digital 201 File. Supported document types shall include: Resume/Curriculum Vitae, Employment Contracts, Government Records, Certificates and Trainings, Performance Evaluations, Disciplinary Records.	High	Operational Requirement	PENDING
	FR-030	Government Record Management	The system shall securely store mandatory government identifiers (e.g., SSS, PhilHealth, Pag-IBIG, TIN) within the Digital 201 File. HROMS shall automatically synchronize these sensitive identifiers with the FOMS database to facilitate accurate statutory deduction computations for payroll.	High	Legal & Compliance Requirement	PENDING
	FR-031	Employment Contract Repository	The system shall maintain a centralized repository of employee employment contracts and contract amendments linked to the employee's Digital 201 File.	High	Legal & Compliance Requirement	PENDING
	FR-032	Certification and Credential Tracking	The system shall allow Admin users to record employee certifications, licenses, and training credentials and store associated documents within the Digital 201 File.	High	Operational Requirement	PENDING
	FR-033	Document Expiration Monitoring	The system shall notify authorized Admin users when employee certifications, licenses, permits, or other tracked documents are approaching expiration.	High	Management Requirement	PENDING
Module 4: Recruitment & Onboarding						
Module 4	FR-034	Public Application Portal	The system shall provide an external-facing web form allowing applicants to apply for open positions. To access the external web, applicants must login using their personal gmail account. The form shall only collect preliminary, low-sensitivity data: Full Name, Email Address, Contact Number, Position Applied For, and a Resume/CV file upload.	High	Business Requirement	PENDING
	FR-035	Application Status Management	The system shall provide a dashboard for the Admin to view all submitted applications and update their current recruitment status through a defined workflow (e.g., Pending Review → Interview Scheduled → Job Offered → Rejected).	High	Operational Requirement	PENDING
	FR-036	Interview Scheduling	The system shall allow the Admin to set an interview date and time and location for an applicant. Upon saving the schedule, the system shall automatically send an email notification to the applicant containing the interview details.	High	Operational Requirement	PENDING
	FR-037	Secure Onboarding Link Generation	When an Admin updates an applicant's status to 'Job Offered,' the system shall automatically generate a unique, single-use, time-expiring encrypted link and send it to the applicant's email address to initiate the formal onboarding process.	High	Security Requirement	PENDING
	FR-038	Bio-Data and Compliance Submission	Accessing the secure onboarding link shall allow the applicant to fill out their official Employee 201 File. The system shall capture highly sensitive employment data, strictly including: SSS Number, PhilHealth Number, Pag-IBIG Number, Bank Account Details, Emergency Contacts, and an optional Tax Identification Number (TIN).	High	Legal & Compliance Requirement	PENDING
	FR-039	Automated Employee Account Conversion	Upon the applicant's successful submission of the Onboarding form, the system shall automatically convert the applicant record into an Active Employee record. This action shall immediately trigger Create User Account and Blind Provisioning without requiring the Admin to manually re-encode any of the applicant's bio-data.	High	Core Business Logic	PENDING
Module 5: Operational Task & Workflow Management						

Module	FR ID	Requirement Name	Description	Priority	Source	Status
Module Number	Requirement ID	Short Title	Functional Specification	Priority Level	Requirement Source	Status
Module 5	FR-040	Create and Assign Operational Tasks	The system shall allow the Operations Admin to create and update operational tasks and these tasks can be assigned to any operations employee within the system. The task shall include description, deadline, priority level, and assigned employee.	High	Business Requirement	DONE
	FR-041	Smart Task Routing Recommendation	Before assigning a task, the Smart Routing algorithm shall automatically exclude any employee whose status is currently set to 'Offline' and 'On Leave'. The system shall also suggest the most appropriate employee to be assigned on a newly created task based on the existing task assigned to them which would be indicated beside their name.	High	Operational Requirement	PENDING
	FR-042	Monitor Task Progress	The system shall allow the Operations Admin to monitor the progress of assigned operational tasks.	High	Operational Requirement	DONE
	FR-043	View Task Completion Reports	The system shall allow the Operations Admin to view reports related to task completion and operational performance.	High	Management Requirement	DONE
	FR-044	Search, Filter, and Sort Tasks and Records	The system shall allow Operations Admin to search, filter, and sort tasks and records by title, status, assignee, priority level, or deadline.	High	Business Requirement	DONE
	FR-045	Reopen Completed Task	The system shall allow Employees to reopen completed tasks but it should be immutable. To make any changes on a completed task, an Admin permission must be required.	High	Business Requirement	PENDING
	FR-046	View Assigned Tasks and Update Progress	The system shall allow Operational Team members to view tasks assigned to them and update the progress status of each assigned task to either 'In Progress' or 'Done.' Operational Team members shall not be permitted to change a task's status to 'Completed.' Instead, once a task has been finished, they shall only be able to mark it as 'Done.'	High	Business Requirement	DONE
	FR-047	Finite State Machine (FSM) Task Enforcement	The system shall enforce a strict, unidirectional state progression for all operational tasks (Draft → Assigned → In Progress → Done (Pending Admin Review) → Completed). The backend logic shall reject any attempt to skip a sequential state or revert a completed task without authorized Admin override.	High	Operational Requirement	PENDING
	FR-048	Recurring Task Template Scheduling	The system shall allow the Operations Admin to create 'Task Templates' with defined recurrence intervals (e.g., daily, weekly, monthly). A backend scheduled service shall automatically generate and assign live operational tasks based on these active templates at the specified intervals without manual user intervention.	High	Operational Requirement	PENDING
	FR-049	Mandatory Task Review Workflow	The system shall restrict standard Operational Team members from permanently marking a task as 'Completed.' Employees shall only be permitted to advance a task to a 'Pending Admin Review' state, requiring the Operations Admin to verify the work before officially closing the task record.	High	Operational Requirement	PENDING
	FR-050	Task-Based Comment System	The system shall allow authorized users to add, edit, and delete their own comments to a specific task.	High	Operational Requirement	PENDING
	FR-051	View Task Comments	The system shall display all comments associated with a task in chronological order.	High	Operational Requirement	PENDING
	FR-052	View Personal Activity Summary	The system shall allow users to view a summary and history of their task-related activities. The summary shall include: total assigned tasks, completed tasks, ongoing tasks, and overdue tasks.	High	Operational Requirement	DONE
	FR-053	Task Notification	The system shall notify users of task assignments, updates, approaching deadlines, and overdue tasks.	High	Operational Requirement	DONE

Module	FR ID	Requirement Name	Description	Priority	Source	Status
Module Number	Requirement ID	Short Title	Functional Specification	Priority Level	Requirement Source	Status
	FR-054	Duplicate Warning Notification	The system shall check for potential duplicate tasks based on matching titles and descriptions during task creation. If a match is found, the system shall notify the Admin with a warning before allowing them to save the task.	High	Usability Requirement	DONE
	FR-055	Workload Monitoring Dashboard	The system shall display task distribution and workload per user to support monitoring of operational activities.	High	Management Requirement	DONE
	FR-056	Priority-Based Task Sorting	The system shall automatically sort tasks based on priority level and deadline.	High	Operational Requirement	DONE
	FR-057	Operational Summary Report	The system shall generate a summary report of operational tasks including total tasks, completed tasks, pending tasks, and performance metrics. The system shall allow the Admin users to download the generated reports.	High	Management Requirement	DONE
	FR-058	Configurable Multi-Level Routing	The system shall enforce a multi-tiered approval engine for designated organizational processes (e.g., Leave Requests, Asset Requests, e-NTEs, and Offboarding). The engine shall sequentially route requests through the established chain of command (e.g., Employee → Immediate Supervisor → HR Admin → Approved) before permanently altering the record's state.	High	Core Business Logic	PENDING
	FR-059	Workflow State Tracking & Notifications	The system shall display the real-time location of a request within the workflow (e.g., 'Pending Supervisor Approval') on the requesting employee's dashboard and trigger automated notifications to the active approver in the sequence.	High	Operational Requirement	PENDING
Module 6: Performance, Training, & Competency Management						
	FR-060	Create Performance Review	The system shall allow Systems Admin and HR Operations Admin users to create performance review periods and evaluation records for employees.	Medium	Management Requirement	PENDING
	FR-061	Employee Performance Evaluation	The system shall allow authorized evaluators to assess employees using predefined evaluation criteria such as productivity, quality of work, teamwork, attendance, and task completion.	Medium	Operational Requirement	PENDING
	FR-062	Performance Rating Management	The system shall calculate and record employee performance ratings based on completed evaluation criteria and performance metrics.	Medium	Core Business Logic	PENDING
	FR-063	Performance Review History	The system shall maintain an immutable history of all completed employee performance evaluations and ratings within the employee's Digital 201 File.	Medium	Legal & Compliance Requirement	PENDING
	FR-064	Performance Improvement Plan (PIP) Creation	The system shall allow authorized Admin users to create a Performance Improvement Plan (PIP) for employees requiring corrective performance actions.	Medium	HR Management Requirement	PENDING
	FR-065	Performance Improvement Plan Monitoring	The system shall track the progress, milestones, deadlines, and completion status of active Performance Improvement Plans and display updates to authorized users.	Medium	Operational Requirement	PENDING
	FR-066	Hierarchical KPI Assignment	The system shall allow Admin users to assign active KPIs across multiple organizational levels, specifically targeting individual employees, specific job positions, or entire departments based on the Organizational Structure.	Medium	Operational Requirement	PENDING
	FR-067	Automated KPI Tracking and Dashboarding	The system shall automate Key Performance Indicator tracking. For Operations and Logistics personnel, HROMS shall periodically fetch raw performance data from the DMS (e.g., completed deliveries, failed deliveries, POD uploads), mathematically converting this external data into objective performance ratings.	Medium	Core Business Logic & Integration Requirement	PENDING

Module	FR ID	Requirement Name	Description	Priority	Source	Status
Module Number	Requirement ID	Short Title	Functional Specification	Priority Level	Requirement Source	Status
Module 6	FR-068	Performance Review Integration	The system shall automatically inject calculated KPI results into an employee's official periodic performance appraisal. The workflow engine shall prevent the manual alteration of system-calculated KPI scores by the evaluating supervisor to maintain strict objective reporting.	Medium	HR Compliance Requirement	PENDING
	FR-069	Competency Profile Management	The system shall allow HR Operations Admin users to create and manage competency categories, skills, certifications, and proficiency levels required by specific positions.	Medium	HR Development Requirement	PENDING
	FR-070	Employee Competency Records	The system shall maintain a competency profile for each employee, including acquired skills, certifications, training completed, and proficiency levels.	Medium	Operational Requirement	PENDING
	FR-071	Competency Report Generation	The system shall generate competency reports displaying employee skills, proficiency levels, and identified competency gaps.	Medium	Management Requirement	PENDING
	FR-072	Probationary Status Assignment	The system shall automatically assign newly hired employees a 'Probationary' employment status upon successful onboarding.	Medium	Core Business Logic	PENDING
	FR-073	Probationary Period Tracking	The system shall automatically track the employee's six (6) month probationary period beginning from the employee's official hire date.	Medium	Core Business Logic	PENDING
	FR-074	Probationary Evaluation Scheduling	The system shall automatically notify HR Operations Admin users and designated evaluators thirty (30) days before a probationary employee reaches the end of the six-month probationary period.	Medium	Operational Requirement	PENDING
	FR-075	Probationary Evaluation Workflow	The system shall allow authorized evaluators to conduct a formal probationary performance evaluation before the completion of the six-month probationary period.	Medium	HR Compliance Requirement	PENDING
	FR-076	Regularization Recommendation	The system shall generate a recommendation for Regularization, Probation Extension, or Separation based on the probationary evaluation results.	Medium	Core Business Logic	PENDING
	FR-077	Employment Status Conversion	The system shall automatically update the employee's employment status from 'Probationary' to 'Regular' upon approval of the probationary evaluation by authorized HR personnel.	Medium	Operational Requirement	PENDING
	FR-078	Probationary Monitoring Dashboard	The system shall provide a dashboard displaying probationary employees, probation end dates, pending evaluations, and regularization statuses.	Medium	Management Requirement	PENDING
	FR-079	Promotion Recommendation	The system shall identify employees who meet predefined promotion criteria based on performance ratings, competencies, certifications, tenure, and disciplinary history.	Low	HR Management Requirement	PENDING
	FR-080	Promotion Workflow	The system shall allow authorized Admin users to create, review, approve, or reject employee promotion requests.	Medium	Operational Requirement	PENDING
	FR-081	Position Change History	The system shall maintain a complete history of employee promotions, transfers, and position changes within the Digital 201 File.	Low	Legal & Compliance Requirement	PENDING
Module 7: Employee Relations, Wellness, & Compliance						
	FR-082	Notice to Explain (NTE) Issuance	The system shall allow Systems Admin and Operations Admin users to issue a formal Notice to Explain (NTE) to an employee. The NTE creation form shall require an infraction category (e.g., Policy Violation, Excessive Tardiness), a detailed description of the incident, and the date of occurrence.	Medium	HR Compliance Requirement	PENDING
	FR-083	Mandatory Employee Response Workflow	Upon receiving an active NTE, the system shall display a mandatory alert on the employee's personal dashboard prompting them to submit a formal written explanation. The system shall enforce a strict 48-hour countdown timer, restricting the employee from dismissing the alert until the explanation is submitted.	Medium	HR Compliance Requirement	PENDING

Module	FR ID	Requirement Name	Description	Priority	Source	Status
Module Number	Requirement ID	Short Title	Functional Specification	Priority Level	Requirement Source	Status
Module 7	FR-084	Disciplinary Resolution & 201 File Integration	The system shall require the issuing Admin to review the employee's submitted explanation, input a final decision or disciplinary action note, and permanently close the case. Upon closure, the system shall automatically append the immutable incident record directly to the employee's Profile/Digital 201 File.	Low	Legal & Compliance Requirement	PENDING
	FR-085	Peer Recognition Submission	The system shall allow any active employee or Admin to submit a 'Kudos' award to a colleague. The submission form shall require the selection of the recipient, a predefined badge category (e.g., Team Player, Problem Solver, Extra Mile), and an optional short message of appreciation. The system shall display a real-time, chronological feed of all awarded Kudos on the main system dashboard, visible to all active users, to promote a culture of transparency and positive reinforcement.	Medium	Usability Requirement	PENDING
	FR-086	Mandatory Policy Publishing	The system shall allow Systems Admin and HR Operations Admin users to publish high-priority company policies or compliance updates, flagging them explicitly in the database as 'Mandatory Acknowledgement Required' for targeted roles or all active employees.	Low	HR Compliance Requirement	PENDING
	FR-087	UI Interruption & Acknowledgment Workflow	Upon an employee's login following the publication of a mandatory policy, the system shall execute a persistent red banner at the top of the screen. This function will restrict them from starting a new task until they click an explicit 'I Acknowledge' button and successfully re-enter their account password.	Medium	Security & Usability Requirement	PENDING
	FR-088	Acknowledgment Audit Logging	Upon the user explicitly acknowledging the policy, the system shall record an immutable audit log containing the specific Employee ID, the Policy ID, and the exact timestamp of acknowledgment. This record shall be appended to the employee's Digital 201 File to serve as verifiable compliance evidence.	Medium	Legal & Security Requirement	PENDING
Module 8: Employee Offboarding & Clearance Management						
Module 8	FR-089	Offboarding Status Trigger	The system shall allow the Systems Admin to flag an active employee account status as 'Resigned' or 'Terminated.' Executing this status change shall automatically freeze the employee's standard operational access while keeping their dashboard active strictly for clearance purposes.	Medium	Security Requirement	PENDING
	FR-090	Automated Clearance Task Generation	Upon initiating the clearance process, the system shall automatically generate a predefined set of clearance tasks (e.g., 'Revoke IT Access,' 'Process Final Pay,' 'Surrender Hardware') and assign them to the appropriate department Admins. These generated tasks shall strictly follow the Finite State Machine (FSM) enforcement.	Low	Core Business Logic	PENDING
	FR-091	Final Account Archiving & Cross-System Dependency	The system shall enforce strict final clearance logic before permanently archiving an employee's Digital 201 File. HROMS shall automatically query the DMS and FOMS APIs to verify that the offboarding employee has zero active logistical liabilities (e. g., pending packages) and that their final pay computation has been fully settled.	Low	Security & Compliance Requirement	PENDING
Module 9: System Utilities, Reporting, & Analytics						
	FR-92	Creation of Announcement	The system shall allow Admin users to post announcements visible to selected users or all users. Selected users can be targeted based on specific roles.	Medium	Business Requirement	PENDING
	FR-93	View Announcements	The system shall allow users to view active announcements upon login or on a dashboard page.	Medium	Operational Requirement	PENDING

Module	FR ID	Requirement Name	Description	Priority	Source	Status
Module Number	Requirement ID	Short Title	Functional Specification	Priority Level	Requirement Source	Status
Module 9	FR-94	Audit Logs	The system shall record immutable logging of every critical system action (e.g., 'User X updated the progress of task titled Task 1 at 2:00 PM on Tuesday').	Medium	Security Requirement	PENDING
	FR-95	View Audit Logs	The system shall allow Systems Admin to view activity logs.	Medium	Security Requirement	PENDING
	FR-96	Attendance Report Generation	The system shall generate attendance reports containing employee attendance summaries, late occurrences, absences, and attendance trends within a selected reporting period.	Medium	Management Requirement	PENDING
	FR-97	Leave Utilization Report	The system shall generate leave utilization reports displaying leave balances, leave consumption, and leave trends by employee, department, or organization-wide scope.	Medium	Management Requirement	PENDING
	FR-98	Recruitment Report Generation	The system shall generate recruitment reports containing applicant counts, hiring pipeline statistics, interview outcomes, job offers, and hiring conversion rates.	Medium	Management Requirement	PENDING
	FR-99	Employee Turnover Report	The system shall generate employee turnover reports including resignations, terminations, retention statistics, and turnover trends across selected reporting periods.	Low	Management Requirement	PENDING
	FR-100	HR Dashboard Analytics	The system shall provide HR Operations Admin and Systems Admin users with a dashboard displaying key workforce metrics including headcount, attendance trends, leave utilization, recruitment statistics, turnover rates, and performance indicators.	Medium	Management Requirement	PENDING
	FR-101	Export HR Reports	The system shall allow authorized users to generate and export operational reports. At the end of every cutoff, HROMS shall automatically generate a mathematically sanitized Daily Time Record (DTR) and Leave payload, transmitting it directly to the FOMS API for automated salary and deduction computations.	Medium	Operational & Integration Requirement	PENDING
